Re: Oxfordshire Transformation Programme

I am writing as Medical Director of Oxford Health NHS Foundation Trust to express my support for the clinical models that are being developed by the Oxfordshire Transformation Programme. I confirm that these models have resulted from a clinically led process, including the active participation of clinical staff from our Trust and clinicians from partner organisations.

I am satisfied that the new models of care will deliver safe, high quality care for the patients we serve, as well as responding to the demographic and financial challenges currently facing the Oxfordshire Health and Social Care system.

Yours Sincerely,

Dr Mark Hancock
Medical Director
